

## Satellite Phone Hire

Functionally similar to the Iridium 9505, this latest offering introduces some minor product changes. It is significantly smaller, lighter and more resistant to water, dust and shock than the original Iridium 9500 and is ideal for industrial or rugged conditions, yet appealing to the travelling professional.

### Why do you need it?

Business, adventure, or pleasure, you can stay in touch across seas and time zones, in remote locations and on the go. One telephone number, through the use of a mini personal subscriber identity module (SIM) card, can help keep you connected

### Benefits of hiring TMS Phones from Landwide

All Landwide Telstra Mobile Satellite phones have a domesticated phone number. This is unique to Telstra and has various advantages.

- Simplified dialling for calls within Australia (just dial the number including the STD code). You don't need to dial international access codes or country codes for calls placed wholly within Australia.
- Telstra Mobile Satellite has direct dialling access to 000 and 112 emergency calls within Australia
- Your family or colleagues in Australia can call your Telstra Mobile Satellite service direct by simply dialling your 01471 prefixed number. They will be charged at the Telstra Mobile Satellite domestic (not international) call rates for calls from fixed and mobile phones plus a connection fee (not at international rates)
- Free access number for support from your Telstra Mobile Satellite handset. Just dial 125 135.
- No charge to receive calls.
- You pay domestic (not international) call rates to available 1800, One3, 1300, and Directory Assistance numbers.
- MessageBank 101 available on request from Landwide.
- MessageBank – no longer requires a pin number to retrieve messages
- 1900 numbers are now available from your TMS handset
- 125 135 is now available as a FREE call from a TMS handset globally

### Accurate and efficient Call data

Landwide has a sophisticated billing system that ensures fast and accurate accounts of you calls generally available within 24 hours. Your bill is produced with all call detail including date, time called, number called and minutes used. These records are produced in similar format to your current Landline phone bill.

## The Package

All Landwide Satellite Phones come in a padded Satellite Phone Bag.

Landwide has developed this bag specifically for its rental fleet not only to protect our equipment whilst on hire but more so with our customers in mind.

Landwide recognises that should an accident occur, especially motor vehicles in remote areas, that our phones needed to survive the impact to ensure communications with the Emergency Services. The bag also needed to be padded to ensure that in the event of an accident, the handset (which Landwide recommends remains secured in the bag whilst travelling) did not become a "brick like missile" and injure the driver and passengers of the vehicle.

Unfortunately some of our handset have been involved in such events and have survived the accident to then be used for what it was originally hired for. An Emergency!

## Iridium 9505A
